

# CB500X

Control Box Extension (5 zones) 230 V

The CB500X extension module control box is an element of the underfloor heating / cooling control system. The control box allows to control 5 different zones. Number of controlled zones can be increased up to 15 zones by connecting CB500X extension modules to the CB500 unit which is equipped with a module system that controls the source of heating and cooling. The spring clamps provide quick and convenient wiring connections. The control box is designed to work with NC (normally-closed) type actuators.

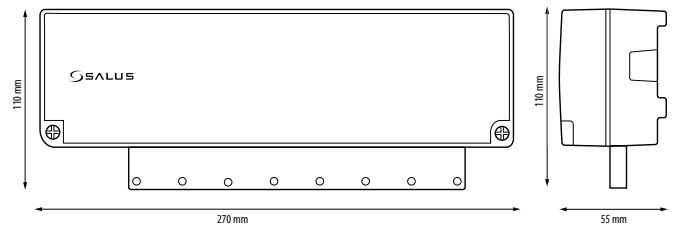

#### Product features:

- control of 5 independent zones
- quick installation with the spring clamps terminals
- wires protection against pulling out
- compatible with CB500 control box
- surface mounting or on DIN rail

#### Technical specifications:

Power supply	230 V AC 50 Hz
Max load	1A
Outputs	AC 230V (for actuators)
Dimensions [mm]	270 x 110 x 55
