

CSB600

Protective Smart Button

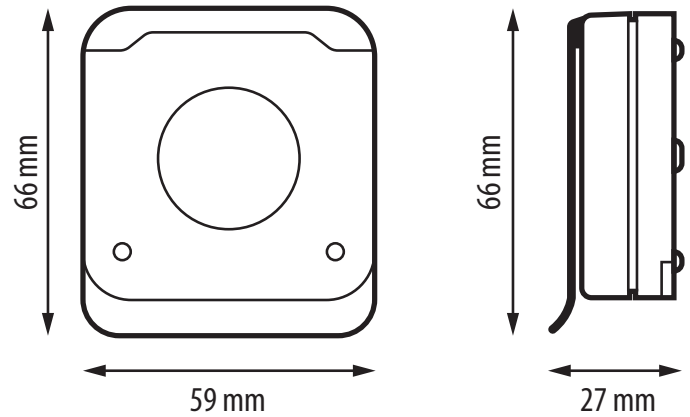

The wireless button is used to start OneTouch rules in the SALUS Smart Home system. Its operation requires the UGE600 internet gateway and the SALUS Smart Home application. It has the option of receiving a free notification of the event (SMS, e-mail).

Characteristics

- Has the ability to act as an alarm button - sending an SMS notification
- Can be a switch for one event (OneTouch rules) - e.g. turn off the heating, start a schedule, turn on the light for a specified time
- Activation of one OneTouch rule without launching the SALUS Smart Home application
- 5 year warranty
