INSTRUCTIONS FOR INTA TRADE-TEC WRAS APPROVED MULTI SLEEVE ISOLATING LEVER BALL VALVES

Trade-Tec WRAS approved multi sleeve isolating ball valves are supplied with two different lever handle sleeves dependant on their intended use at installation.

BLUE SLEEVE - (already attached to the valve) for use in cold water installations RED

SLEEVE - for use in hot water installations

If the intended use of the valve is for hot water installations, select the red sleeve and then slide it onto the lever handle leaving the blue sleeve in place.

THE RED SLEEVE IS DESIGNED TO SLIDE OVER THE BLUE SLEEVE

DO NOT REMOVE THE BLUE LEVER HANDLE SLEEVE.

If you encounter difficulty sliding the red sleeve over the blue lever handle, wipe the blue handle with a damp cloth to decrease the friction between handle sleeves.
